WORK EXPERIENCE

Computer Instructor

The Prime Public Institute

08/2024 – Present

Achievements/Tasks

- Design practical projects and activities to improve learning, teaching programming languages and computer basics to students of various level. Helped students successfully develop their first basic level applications. Improved class performance and inspired several students.

Administrator & Computer Instructor

The Bright Way Institute

02/2022 – 09/2023

Achievements/Tasks

- I successfully managed digital projects across the school, helping to improve computer skills among students. I made lab operations more organized, which made classes run more smoothly and helped students learn better. I also arranged training workshops and helped plan IT courses.

PROJECTS

Accounts Master *Software Solution*

- The system improve accounting accuracy, minimize manual workload, and accelerated for small and medium-sized businesses. Designed and implemented modules for handling sales, purchases, expenses, and customer management. Generate reports, balance sheets, and invoices to streamline business operations. Built the application using C# (Windows Forms) and MS SQL Server, with development carried out in Visual Studio.

Pharmacy Management System

- Developed System to optimize daily pharmacy operations by efficiently handling medicine inventory, sales tracking, and prescription management. Designed and implemented features to reduce manual errors and enhance customer service quality. Built the application using C# (Windows Forms) and MS SQL Server, with development carried out in Visual Studio to streamline stock management and improve service delivery.

EDUCATION

Bachelor in Computer Science - (BSCS)

From University Of Sindh

01/2022 – 12/2025

Capstone Project: *Body Nest (GYM Software)*

- Body Nest is a gym management system developed to handle daily operations such as member management, fee tracking, and fitness reporting, helping gym staff streamline tasks and improve service quality. I independently designed, developed, and tested the entire application using C# (Windows Forms) and MS SQL Server, with development carried out in Visual Studio, focusing on creating a user-friendly and efficient system tailored to the needs of gym owners.

TECHNICAL SKILLS

Programming Languages

C++, C#, Java

Web Development (Front-End)

HTML, CSS, JavaScript

Tools

Visual Studio, NetBeans, Turbo

Database Management

MS SQL Server

ADDITIONAL SKILLS

UI/UX Design

MS Office

Problem-Solving

Teamwork

Multitasking

Networking

Project Management Tools

CERTIFICATES

- Java Programming Language
Research Gate, Pakistan | December 2023
- SQL Developer Certification
Research Gate, Pakistan | July 2024
- Mathematics Certificate
IBG Institute Lrk, Pakistan | 2021-2022

ACHIEVEMENTS

Top Performer – Research Gate, Pakistan

Certified Java Developer – Research Gate

Position Holder *Mathematics* – IBG institute

LANGUAGES

English - *Intermediate Proficiency*

Urdu - *Full Professional Proficiency*
